

# Model: **JB-455**

3,679,200 MWh of Annual zero emission electricity  
(4,369,050 MWh maximum)

## **JB-455** Power Plant

The JB-455 Power Plant uses patented technologies and proven components by using the power of the sun, wind, and the magnetic power of the Earth to provide clean, emission free electricity 24/7/365. Each generator produces 3,679.2 MWh / yr of continuous, reliable electricity which can also be configured to create large-scaled substations of distributed power.

Ratings Range: (per Marathon Generator Specifications)

Either 50 or 60 Hz

Prime: kW 240

Amps: 240

kVA 1500

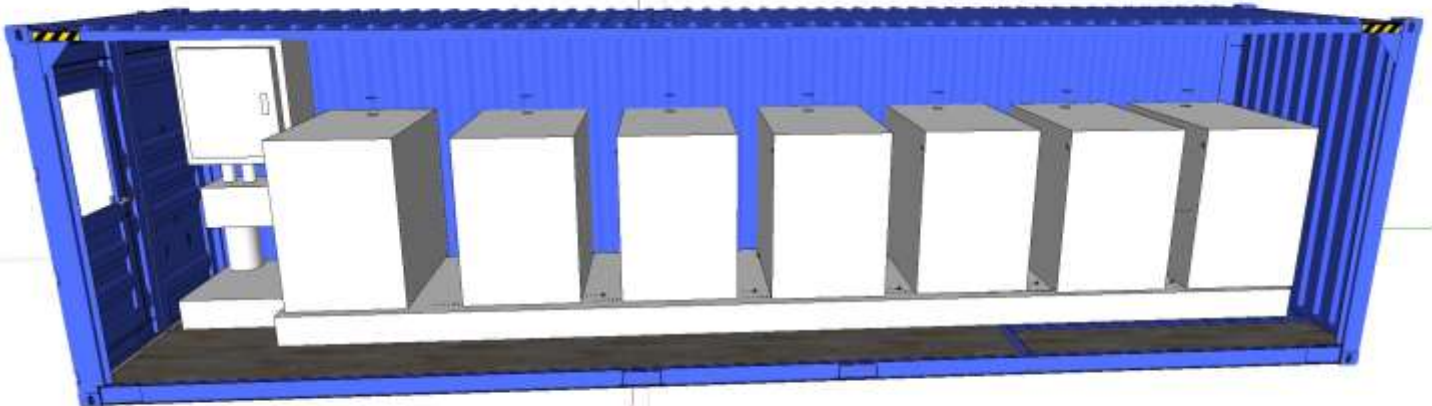

Volts: 4160

### **Standard Features**

- Solar Panels are included with the JB-455 Power Plant System
- Each JB-455 is permanently mounted in a 40 foot cargo container
- The containers can be double stacked and contained in a weatherproof building
- 420 kW output
- 400 Sq Ft Footprint

## **JB-455**

3,679,200 kWh Annually

### **Manufacturer's Warranty**

When you include an annual service and monitoring contract with your JB-455, manufacturer warrants the JB-455 will operate within the stated parameters for a minimum period of Ten (10) years from the date of final commissioning. Operational expense is less than \$0.01 kWh.
